SHEETING

Annexure: 13

Always use a chalk for accurate drilling and screwing .the gives better appearance and less risk of leakage due to misdrilling.

At the end of each working day clean the roof with soft brush .sweep off old drill bits, pop rivets, swarf from drilling or cutting .these items can cause rusting if they are not removed.

-when walking on the roof, do not stand on high ribs can cause severe damage which could lead to possible leakage.

-do not walk on skylight.

Mark out the sheeting along the length of the building, this will give correct and avoid creep.

Preparation for sheeting and handover of successfully erected building.

Touch-up any damage paint on the main frame prior to sheeting commence wall sheeting first.

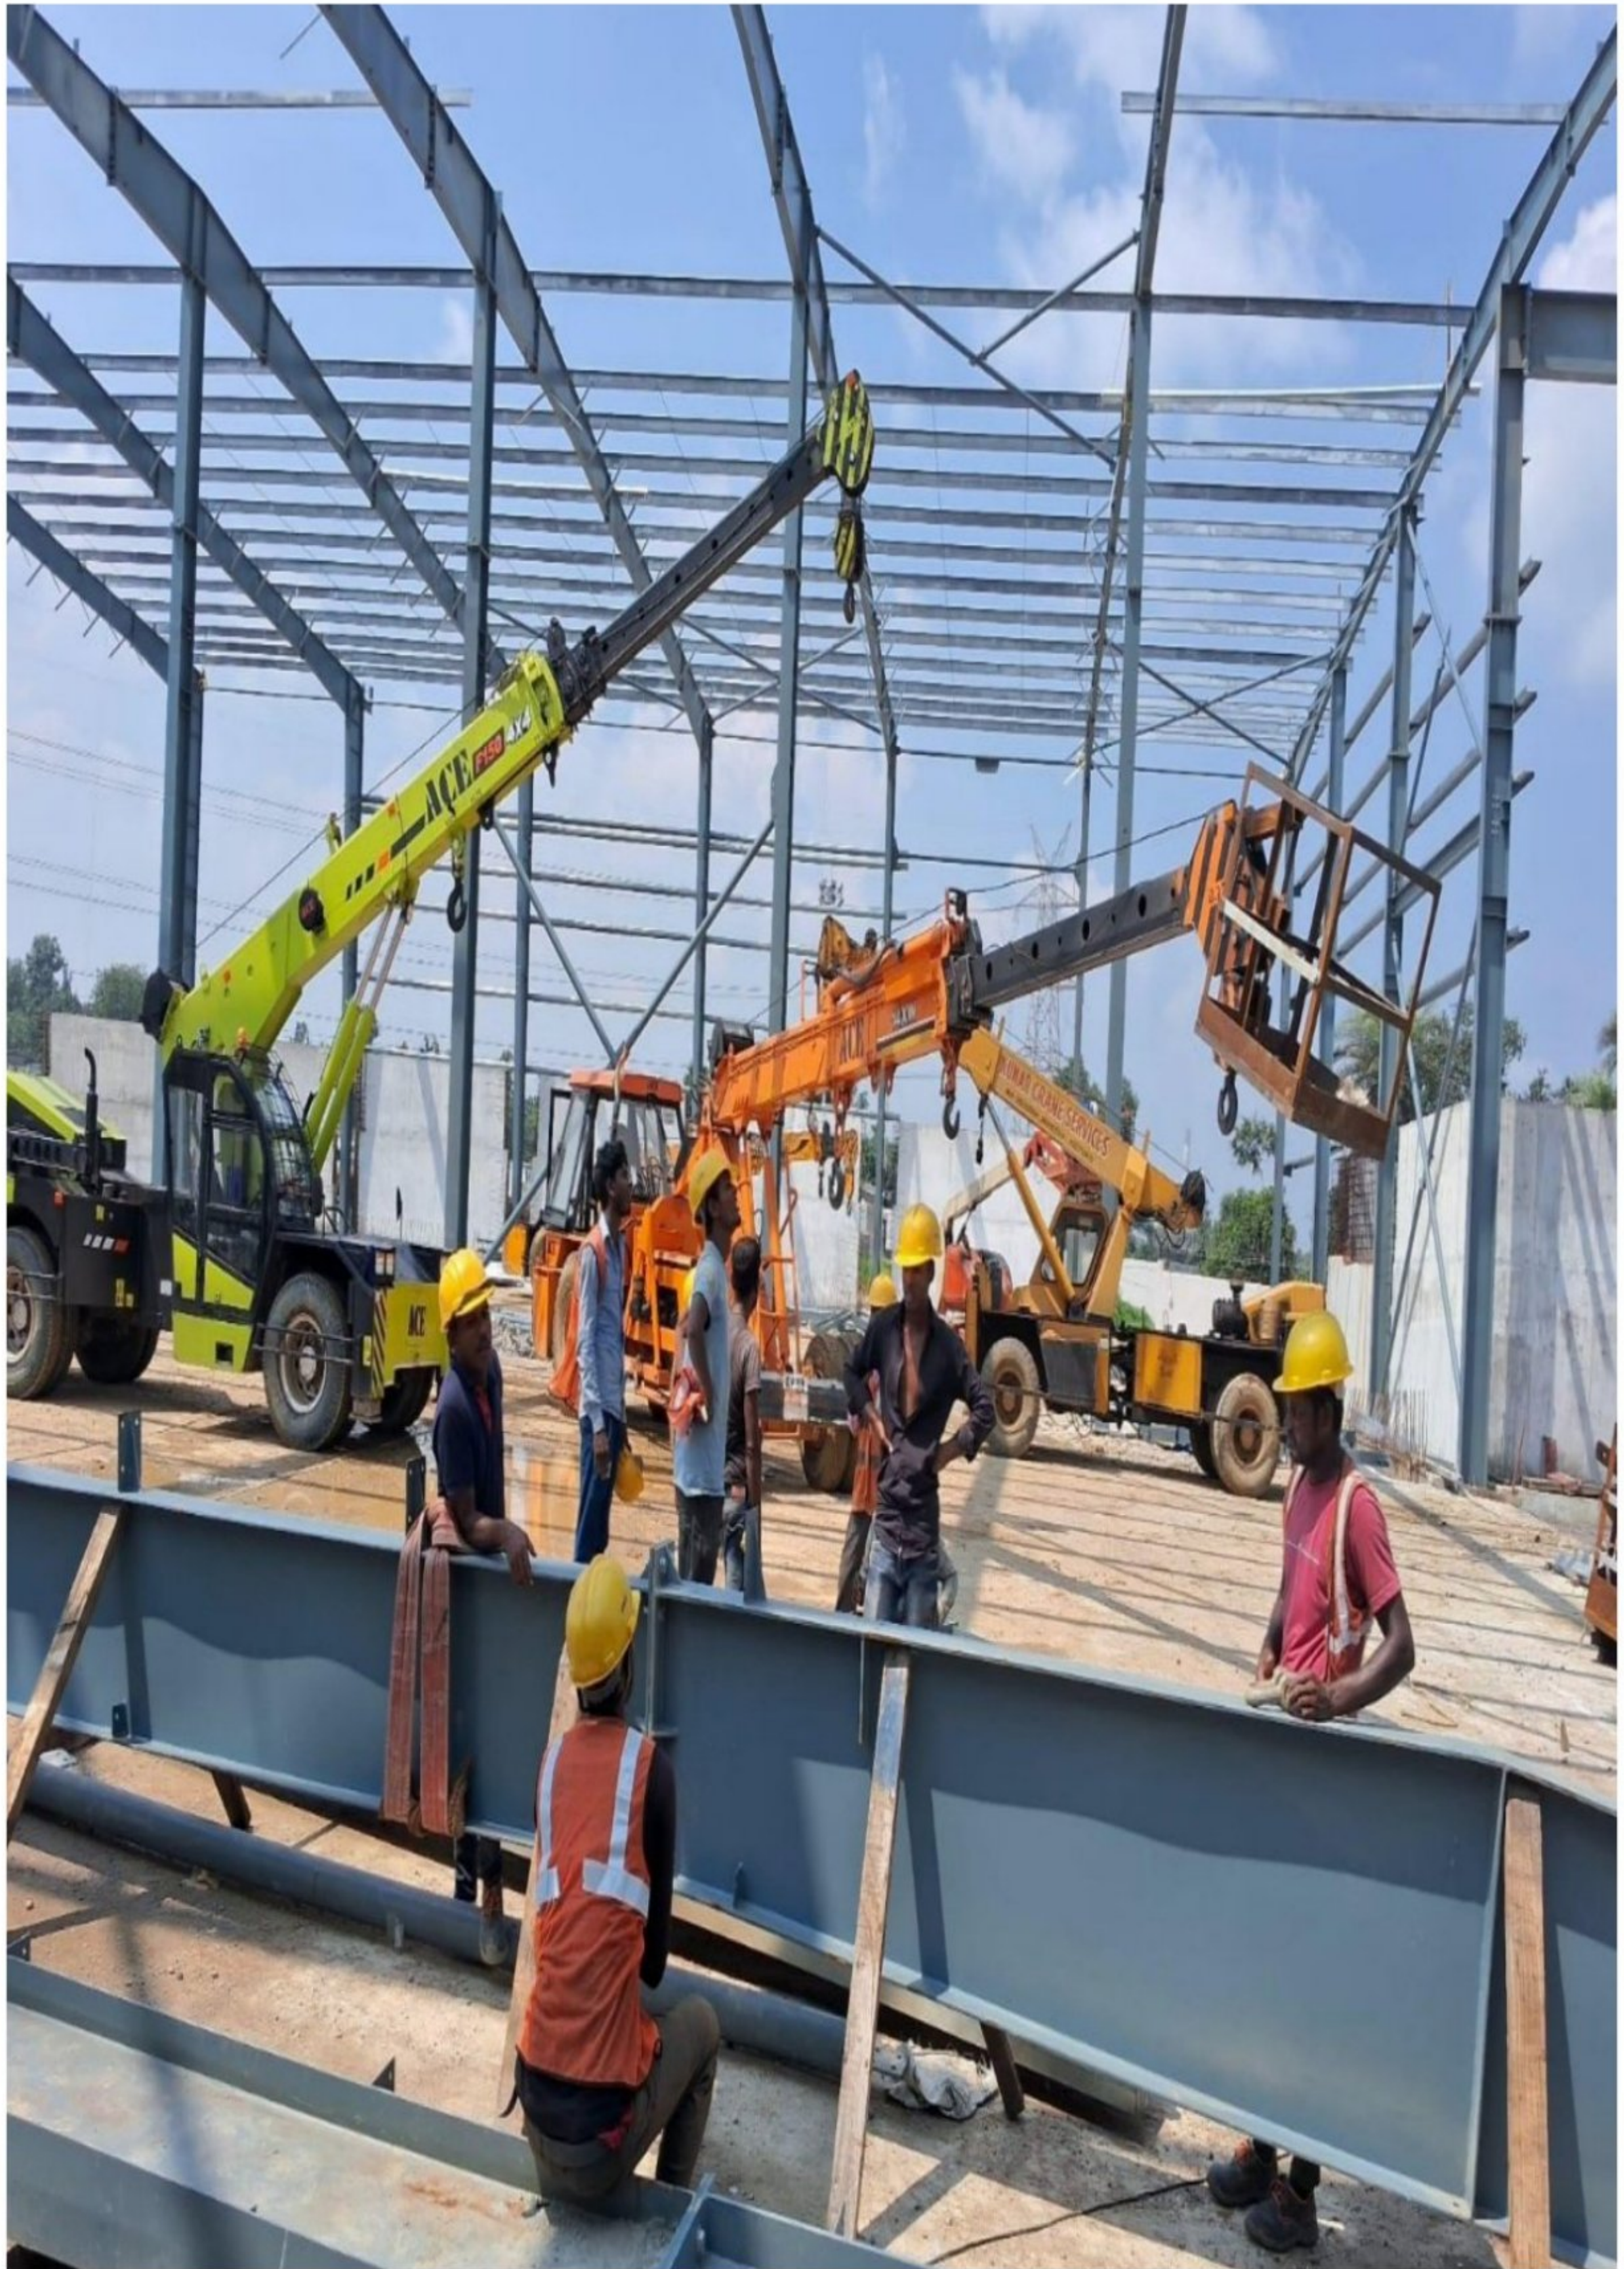

All tests and alignment tagainto be rechecked before submission of the complete building to the client.

Types of buildings

Annexure:14

- (1) Ware-house
- (2) Industrialbuilding
- (3) commercialbuilding
- (4) officialbuilding
- (5) Showrooms
- (6) carparking
